## Say HELLO to your new sticker and also a big thank you for you purchase

To help with your purchase, below you will find a quick guide to applying your vinyl sticker to your chosen surface correctly and with best results.

**PLEASE NOTE:** Your sticker can be applied wet or dry, however we recommend the **WET** method as this will allow for re-adjusting and reduces the chance of bubbles. The wet method is **STRONGLY** recommended for beginners

### Items to help fitting your sticker

- Cleaning wipe (optional)
- Kitchen towel or rag
- Water and washing up liquid
- Tape measure / ruler (optional)
- Spray bottle (optional)
- Squeegee (or credit/debit card)
- Hair dryer (optional)
- Masking tape (optional)
- Pin (optional)

### Step by step fitting

- 1 Clean your chosen surface with a dry cloth. The surface needs to be clean, dry and not freshly painted to get best results.
- 2 Choose where you would like to apply your sticker, ideally a flat surface. You can measure and mark with masking tape to make sure you get your sticker central and straight if necessary.
- 3 Apply a mixture of washing up liquid and water in spray misting bottle to your chosen area. Don't be afraid to use too much liquid as this will allow for repositioning if you are not happy with the placement.
- 4 Slowly peel off sticker from the backing paper. Careful that no dust or dirt gets near the adhesive as this may leave raised areas when sticker is applied.
- 5 Place your sticker onto the wet surface and arrange until you're happy with the position
- 6 Using your squeegee\* carefully rub over the sticker to ensure that it adheres to the surface and try to gently remove any air bubbles.  
\*Although a credit/debit card can be used, we would recommend using a squeegee with foam tip to avoid damaging your sticker. You can order these from our website.
- 7 Leave for 10 minutes and then check back to reassess the position and check for any more air bubbles.  
Any remaining air bubbles can be removed by making a VERY small hole with a pin.
- 8 Leave your sticker to dry for up to 24 hours before touching. You can also use a hair dryer to speed up the adhesion process.

If you require any further help or advice when applying your sticker please don't hesitate to contact us at **01305 302820** or email [sales@stickerzilla.co.uk](mailto:sales@stickerzilla.co.uk)

**ORDER DIRECT** from [www.stickerzilla.co.uk](http://www.stickerzilla.co.uk)
